

HYDRAULIC PTY LTD & PNEUMATIC

For over 40 years, Hydraulic & Pneumatic Pty Ltd has been a leading supplier of hydraulic and pneumatic products and services to the mining, power, forestry, pulp & paper, agriculture and transport sectors of Gippsland and beyond.

HYDRAULIC & PNEUMATIC

OUR VISION

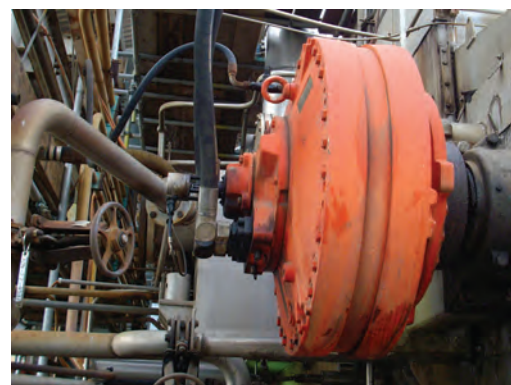

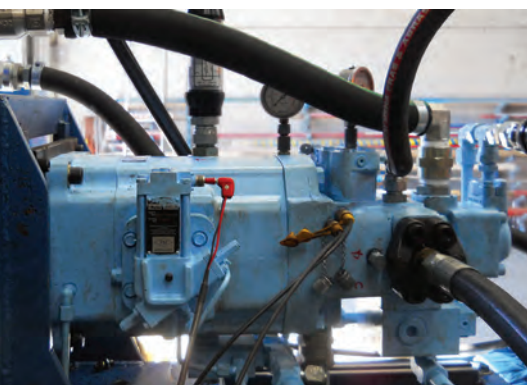

Focussing on delivering first class customer service and technical know-how, our vision is to be the pre-eminent choice for safe, innovative, reliable, and cost effective hydraulic and pneumatic solutions.

OUR TEAM

With over 100 years combined experience and continued investment in training and development, our local team has the knowledge, expertise and dedication to deliver high quality hydraulic and pneumatic solutions with confidence and consistency.

Our team prides itself on understanding the needs and challenges of our customers and meeting or exceeding their expectations.

OUR SERVICES

We provide a wide range of specialised hydraulic and pneumatic services tailor-made for each application. Backed by a core group of engineers and supply chain, our service team has the depth and capacity to respond to any situation.

Our service philosophy is built on understanding the needs and constraints of our clients, their assets and production requirements, and working side-by-side with them to deliver safe, innovative and productive outcomes.

Our drive-through workshop facility contains overhead cranes and specialised equipment for testing, calibration, manufacture and repair. Amongst our fleet, we have five fully prepared on-site trucks that can respond to call-outs under breakdown and emergency situations. We stock considerable inventory and can source components expediently to minimise downtime.

Our Service scope covers:

- Specification, auditing and design of new or upgraded systems
- Trouble shooting and root cause analysis
- On-site repairs and hose/fitting replacements
- Pump, motor, valving, cylinder and hose repairs and servicing
- Cylinder manufacture
- Testing, commissioning and certification of high tonnage equipment
- Synchronised lifting
- High tonnage lifting
- Bridging weighing
- Centre of gravity analysis
- Ball path repairs on drag-lines and dredgers
- Lubrication system repairs

“Our team of highly trained customer support staff, engineers, and technicians provide innovative technical solutions at each stage of the product life-cycle – from specification, selection, design, construction, installation, commissioning through to after-sales servicing and inventory management.”
